

“CYBER SECURITY ISSUE”

EPC Retirement Plan

5 WAYS TO PROTECT YOURSELF FROM CYBER FRAUD

- 1 Set up online access for your Fidelity account with a unique username and password.** You create or access your account at: www.netbenefits.com/EPC. Make sure to use a strong, unique password for your retirement account. If you reuse your password for multiple websites and a hacker exposes your password on the dark web all of your accounts will be exposed!

For your EPC Retirement account go to NetBenefits.com and select Register as a new user. If you already have your account set up you can update your password with a unique password by going to your profile > Security Center and update your password in the Login Information section.

[Creating a Strong Password >](#)
- 2 Sign up for 2-Factor Authentication at login.** Provides an extra layer of security added to your Fidelity NetBenefits account to prevent someone from accessing your account.

Visit NetBenefits.com > Profile > Security Center to sign up. You must have your phone number on file in NetBenefits to be eligible for service. It is for your protection!

[How 2-Factor Authentication Works >](#)
- 3 Add or update your mobile phone number and email address.** This enables you to receive real-time alerts and confirm sensitive transactions.

Visit NetBenefit.com > Profile > Personal & Contact Information.
- 4 Sign up for eDelivery and monitor your Fidelity Retirement account REGULARLY.** Check account statements and other documents for unauthorized activity.

Go to NetBenefits.com > Profile > Communication, to receive your documents via email or U.S. mail.
- 5 Enable Fidelity MyVoice.**

To enroll and learn how voiceprint protects you, call Fidelity at 800-343-0860. You will need to provide consent to create your unique voiceprint.
